

James Hatt and Associates fulfill all of the musculoskeletal requirements for Marlborough College. Having worked with the college for over 10 years, the service provided is extremely efficient and offers the very best in private healthcare.

Students and staff can benefit from immediate access to treatment at their Marlborough clinic which is situated only 100 yards from the college. Appointments can be arranged via a referral from the Marlborough College GP or parents and guardians are welcome to call directly on 01380 730473. Treatments can be funded either by private medical insurance or by self funding which can be invoiced to you directly.

The highly experienced team of Physiotherapists have excellent links with local Orthopaedic Consultants at hospitals in and around the Marlborough area should there be a requirement for onward referral. All of the Physiotherapists have completed post graduate paediatric/adolescent training to a high standard enabling them to be particularly sensitive and effective to the requirements of such a specialist patient group.

At the student's initial appointment they will be fully assessed detailing a full musculoskeletal examination. They will then be provided with a diagnosis and a structured and comprehensive treatment plan regarding future management. The James Hatt and Associates team use a multi-disciplinary approach to patient management, and therefore may use the service of one of their team of specialists, including Biomechanical podiatrists, Chiropodists, Massage therapists, Physiotherapists and a Sport Medicine Physician.

For further information, please contact the patient services team on 01380 730473 or visit their website: [www.jameshattphysio.co.uk](http://www.jameshattphysio.co.uk).
